We Know Bugs

Academy Pest Control, Inc. will be treating your home for bedbugs on _____ at _____. Your cooperation is essential for our treatment to be successful. Please complete the following prior to our arrival.

TENANTS RESPONSIBILITY PRIOR TO OUR ARRIVAL:

1. Collect all fabric items (pillows, sheets, blankets, clothing, etc.). Place them in trash bags and seal.
2. Remove bags from infested area.
3. All items need to be dried at HIGH temperature for 20 minutes. Minimum temperature is 115 F. Heavier loads may require additional time. Dispose of the trash bags; they may contain bedbugs shaken from the fabric.
4. The infected room must be vacuumed thoroughly. When done, remove the vacuum bag and dispose of it in the outside trash receptacle.
5. All other personal items need to be inspected and if free of insects, removed from the infested area. Infested items may need to be disposed of.
6. Remove all pets for 4 hours.
7. Allow a minimum of 4 hours for our products to dry before returning your possessions to the room.
8. Furniture will be inspected and treated, however, we may recommend the disposal of heavily infested furniture. Do not move furniture prior to our arrival.

Bedbugs are very difficult to eradicate. Without your cooperation we will NOT be successful.

Thank you,

Joshua Boynton
Manager
